Quantis 8.1

Hedra® Swing Frame

- **New Color Palette for 2021!** Introducing New Matte Metallic Colors created to complement the vibrant saturated colors in our existing palette these nature-inspired matte metallics have a subtle sparkle that gives them eye-catching dimension. The unique finish creates a soft, smooth feel to the touch.
- **Quantis 8.1 Net Structure** - a playground net climbers, with belting, swings, gliders and so much more deliver infinite play experiences for users of all ages and abilities. When children climb, they engage and exercise large arm, leg and back muscles that build upper-body, lower-body, and core strength. As children work to figure out how to physically navigate a piece of equipment, especially one that is new to them, they also develop their problem-solving skills.
- **New to the Hedra® Collection** - We put a twist on traditional swing frames! The Hedra® Swing Frame complements the geometric forms of our Hedra® playstructures or adds a visual surprise to any play environment.
